iCATsystem **vision**
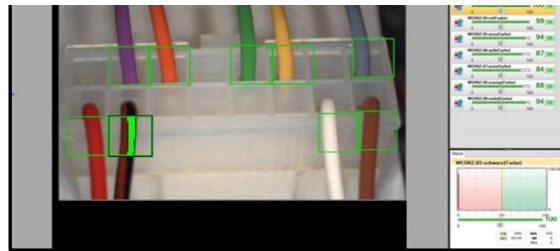

A smart monitoring system of the [iCATsystem product family](#) for optical testing tasks.

In combination with our iCAT test system, the vision sensor module can be used for a multitude of optical testing tasks.

Example of the evaluation via the supplied software

Example of iCATsystem vision with test box module

For instance, it is possible to check the color, arrangement and order of cables without requiring extensive setup.

Sample application of a complete test station for checking a colored protective coating
