

## iCATsystem fusion HV

The **iCATsystem fusion HV** stands out thanks to its **high flexibility** and **minimum tooling time**. This means that production employees can easily retool the testing tables.

The unique structure of the system makes a **high number of test points** possible – **with just two connection cables** (data and voltage) and **without expanding** the central testing hardware.

The **modular structure** of the **table system** allows it to be configured into various sizes and designs, so the **testing table** can be adapted to a wide range of requirements.

**Maximum test voltage**  
**iCATsystem fusion HV:**

**3,750V DC/max. 12mA**  
**2,650V AC/ max. 3mA**
